PROFILE

Final-year B.Tech Data Science student, currently interning as a Data Analyst, skilled in Python, SQL, Power BI, and machine learning. Experienced in building production-grade REST APIs, RAG-based AI pipelines, and interactive data dashboards. Focused on turning raw data into actionable insights and delivering end-to-end data-driven solutions.

EDUCATION

D.Y. Patil Agriculture and Technical University, Talsande | B.Tech (DS) | CGPA: 8.4/10 | 2022 - 2026

INTERNSHIP

Data Analyst Intern - QualTech Software Pvt. Ltd., Kolhapur | Aug 2025 – July 2026

- Built and deployed 10+ REST API endpoints using Python and FastAPI as part of a professional dev team, handling database operations across 25+ tables using HeidiSQL in a live production environment
- Collaborated with a 12-member professional dev team using Git — reviewing PRs, resolving merge conflicts, and maintaining version history across multiple branches in a live production environment

SKILLS

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, EDA, Data Wrangling
- **Visualization & Tools:** Power BI, Matplotlib, Plotly, Streamlit, Excel, Tableau
- **AI & Machine Learning:** Machine Learning, Statistics, Generative AI, LangChain, Pinecone, RAG
- **Technologies & Frameworks:** Git, FastAPI, HeidiSQL, React.

PROJECTS & EXPERIENCE

MedVeda-AI — AI-Powered Medical Assistant

Live: <https://medveda-ai.onrender.com>

- Built a RAG-based medical AI using LangChain, LangGraph, and Groq (Llama-3.3-70b), grounded in 2 authoritative medical encyclopedias processed into 36,000+ vector chunks via Pinecone for hallucination-free health responses
- Integrated Google OAuth2 and an agentic web search fallback, deployed end-to-end on Render with a React 19 frontend

Tech: Python, FastAPI, SQL, Google OAuth, LangChain, LangGraph, Pinecone, Groq.

Olympic Data Analysis — Interactive Web App

Live: <https://olympicanalysis-009.streamlit.app/>

- Cleaned and analyzed 270,000+ records spanning 120 years of Olympic history using Pandas and NumPy, uncovering insights across medal tallies, country-wise performance, and athlete-level trends
- Built and deployed an interactive Streamlit web app with dynamic Plotly visualizations for country-level and athlete-level insights

Tech: Python, Streamlit, Pandas, NumPy, Plotly, Matplotlib

CERTIFICATIONS

Artificial Intelligence — SmartBridge x Google for Developers | March 2026

- Completed a certified course covering Data Science and AI fundamentals, with a capstone project on classification of pumpkin seed varieties using machine learning

Deloitte — Data Analytics Job Simulation | August 2025

- Completed Deloitte's Data Analytics simulation on Forage, analyzing e-commerce datasets and creating Tableau dashboards for business decision-making
